AMENDMENTS TO THE CLAIMS

- 1. (Original) A blister pack comprising a front part having a recessed portion for 1 receiving and containing an article to be packaged, a back part having a relieved portion adapted 2 for insertion into the recessed portion of the front part for closure of the pack, and co-operating 3 locating means on the front and back parts respectively to maintain the pack in a closed condition; 4 characterised in that the locating means comprises an abutment on the inner wall surface of the 5 recessed portion of the front part, and a co-operating abutment on the outer wall surface of the 6 relieved portion of the back part, the inner and outer wall abutments being located thereon such 7 that they become inter-engaged to close the pack only when the back part is contained wholly 8 within the recessed portion of the front part. 9
- 2. (Original) A blister pack according to Claim 1, wherein the front part has a flange extending around the rim of the recessed portion.
- 3. (Original) A blister pack according to Claim 2, wherein the flange includes an aperture for suspension of the blister pack upon a display hook.
- 4. (Currently Amended) A blister pack according to Claim 2 [or Claim 3], wherein the flange includes a peripheral formation to provide the appearance of a weld.
- 5. (Currently Amended) A blister pack according to [any preceding claim] Claim 1,
 wherein the abutment of the front part comprises a continuous ridge protruding inwardly from the
 wall surface of the recessed portion.
 - 6. (Currently Amended) A blister pack according to [any preceding claim] Claim 1,

1

- wherein the abutment of the back part comprises a continuous narrow flange protruding outwardly
 from the relieved portion.
- 7. (Currently Amended) A blister pack according to [any preceding claim] Claim 1, wherein the front and back parts of the pack are connected together by an integral hinged portion, the entire pack being formed by deformation of a single sheet of translucent plastics material.
 - 8. (Currently Amended) A blister pack according [any preceding claim] Claim 1, wherein the front part, on its inner or outer surface, has a surface texture to render the front part translucent with reduced transparency.

- 9. (Original) A blister pack according to Claim 1, wherein the front part has a stepped recess forming a plinth with an outer flange extending peripherally around the plinth.
 - 10. (Currently Amended) A blister pack according to {any preceding claim} Claim 1, wherein the respective abutments of the front and back parts become inter-engaged with a snap action when the pack is closed.
 - 11. (Currently Amended) A blister pack according to [Claims 5 and 6] <u>Claim 5</u>, wherein the abutment on the inner wall surface of the recessed portion of the front part extends from said wall surface to a greater extent than tat by which the abutment of the relieved portion of the back part extends from the outer wall surface thereof.
